Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 January 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 20, 21, and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Jasperson, Design Patent Des.305,496. See below figure. A hand tool, comprising a curved trowel blade having a lower surface tangent to a plane; a handle attached to the blade, the handle being curved in a plane perpendicular to the plane tangent to the blade; the handle including an outer surface defining a portion of a circular arc; and wherein the handle terminates in a gripping section that intersects and extends beyond the plane tangent to the blade. The circular arc has a center below the plane tangent to the blade. Regarding claim 31, the device is capable of performing as claimed.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jasperson. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device in the claimed manner since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233. Such modifications are not critical to the design and would have produced no unexpected results. One reason for making such modification may be for optimizing comfort of the gripping surface for the average user.

5. Claims 24 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jasperson. It would have been an obvious matter of design choice to make the different portions of the device of whatever form or shape was desired or expedient. A change in form or shape is generally recognized as being within the

level of ordinary skill in the art, absent any showing of unexpected results. *In re Dailey et al.*, 149 USPQ 47. Such modifications are not critical to the design and would have produced no unexpected results. One reason for making such modification may be for optimizing comfort of the gripping surface for the average user.

6. Claim 30 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jasperson. Jasperson shows what appears to be a polymeric covering, but it is not explicitly described. The examiner serves Official Notice that it is old and well known in the art of handles to use such covers for the purpose of improved gripping and comfort. It would have been obvious at the time the invention was made to modify the devices in this way, for the purpose of providing improved gripping and comfort.

Response to Arguments

7. Applicant's arguments with respect to claims of record have been considered but are moot in view of the new ground(s) of rejection. New art has been applied in view of applicant's amendments, as outlined in the above rejections.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark A. Williams whose telephone number is (571) 272-7064. The examiner can normally be reached on Monday through Friday.
